

Join over 550,000 users worldwide, who have completed over five million modules

BMJ Learning offers medical professionals a fast and efficient way to test their knowledge and keep updated with the latest developments in medicine.

Covering a variety of clinical and non-clinical topics, BMJ Learning allows users to explore hundreds of interactive learning modules, across over 70 specialty areas.

BMJ Learning is an established international leader in evidence-based, independent and peer reviewed continuing medical education (CME)/ continuing professional development (CPD) and is currently accredited in over 40 countries, by over 50 accrediting bodies and institutions.

## At a glance BMJ Learning provides:

- Independent, peer reviewed modules written by international experts using the latest available evidence
- Over 1,000 modules accompanied by key information such as target profession, length and type of module, learning outcomes and user reviews to help you select the most relevant content
- Clinical scenarios that give you the opportunity to test your knowledge in practice
- Ability to print certificates upon successful completion of modules to demonstrate tangible evidence of learning.

"BMJ Learning helped me to conduct preventative measures during flu season and prepare learning material for colleagues and medical students."

Healthcare professional, Georgia

## Flexible learning:

BMJ Learning provides a range of different modules to suit every individual learning style.

**Just in time** - these modules present you with the essentials of everyday conditions in a clear and concise way, for streamlined learning that you can add to your professional records.

**Interactive case history** - using real-life consultations on various conditions, these modules take you through the issues and provide questions to test your knowledge throughout and guide you through the key learning aspects.

**Read, reflect, respond** - these modules are designed to give you greater insights into the topics and reflect on key issues and opinions. You can read the feedback from other users and respond with your own thoughts and opinions.

**Multiple choice questions** - these modules are associated with an article in BMJ Journals and consist of a quiz to check your understanding of the key issue that article explores.

**Multimedia modules** - provide an opportunity to test yourself in simulated environments with audio, video and animations.

## A customised and personal learning experience

Once you have signed in, you will see your BMJ Learning home page which is personalised based on the information you have supplied to us. A list of suggested modules will be presented based on your professional, specialty and country. You can update your information at any time in the 'Update your details' bar at the top of the home page.

Once you have started a module, you can pause or restart it at any time, making it easier to fit your learning into a busy schedule.

## Select learning modules with ease

**Search** - you can use the search bar to type subjects or keywords which are of interest to you. This will display a list of the modules that are relevant to your search topic.

**Browse** - you can use the 'browse by speciality' function to view all the modules available, sorted alphabetically and by key topical groupings. As you browse modules on the site, you can add them to your BMJ Portfolio, to complete at a later date.

**Select from your 'suggestions'** - You'll see a selection of modules on your personal BMJ Learning home page. These are tailored for you based on your professional, specialty and country.

## Keep an online record of your learning with BMJ Portfolio

BMJ Portfolio helps you track and record your professional development online. You automatically receive your own Portfolio, viewable from your personal home page.

BMJ Portfolio allows you to add tags, filters and download reports and certificates. This enables you to manage your own development activities and prepare for appraisals with ease.

"BMJ Learning has helped me in updating my knowledge to the most recent guidelines. The more I practice, the more benefits and updates I get. This reflects directly on my career obviously from confidence in dealing with patients as well as delivering standardised, evidence-based services to them."

Emad Eltayeb A Eltoun  
Medical Resident, Saudi Arabia
