

Great news, your institution recently subscribed to **Research to Publication** giving you full access to its online learning

# Welcome to Research to Publication

## What is it?

*Research to Publication* is an e-learning programme to help you design, conduct and report on research that journal editors will want to publish.

Developed by BMJ and UCSF for doctors and healthcare researchers, particularly early in their careers, it comprises six courses containing over 200 hours of expert tuition.

Watch Research to Publication video

## Benefits

- Build technical research skills
- Improve your research quality
- Advance your career by getting papers published
- Learn at your own pace
- Understand the issues that prevent researchers getting published
- Help improve patient outcomes with new evidence

## Courses

- How to develop and report good research questions
- Developing and writing protocols
- Choosing the best study design
- How to do ethical research
- How to write a research paper
- The essentials of running a clinical trial
- Picking the right journal and getting published
- Avoiding scientific misconduct

## Modules

All materials include real examples, including policies and case studies focused on how to present and publish your research.

Work through a variety of multimedia to develop your research and publishing skills; including video lectures, narrated slides, reading materials and online assessments.
